Cambio Healthcare Systems Announces Collaboration with Qualcomm's Capsule to Scale Connected Health in Northern Europe

Cambio Healthcare Systems, the leading electronic health record (EHR) company in the Nordics, today announced that it has entered into a reseller agreement with Capsule Technologie, a subsidiary of Qualcomm Life, Inc., a subsidiary of Qualcomm Incorporated, to enable medical device connectivity and integration in hospitals. Cambio will leverage Capsule's SmartLinx™ Medical Device Information System to seamlessly capture and integrate medical device data into Cambio's COSMIC solution, a comprehensive eHealth clinical support and patient administration platform for hospitals and clinics. Cambio made this announcement during eHealth Week, taking place June 8 – 10 in Amsterdam.

Capsule is the leading provider of medical device integration solutions with over 2,000 hospital customers across 39 countries. Capsule's SmartLinx Medical Device Information System enables connectivity to over 780 medical devices, including spot-check monitors, ventilators, vitals signs monitors, infusion pumps and dialysis machines, to capture and send validated vital signs to EHRs. SmartLinx can reduce charting time from hours to seconds by eliminating time-consuming, error prone manual entry of vitals during or after nursing rounds, ultimately enabling clinicians to spend less time charting and more time caring for patients. Cambio will offer Capsule's SmartLinx solution to its COSMIC clients, which today total over 100,000 users in northern Europe and the United Kingdom.

We're excited by this opportunity to better meet the needs of our customers and their patients by bringing them this powerful new connectivity solution. Both Cambio and Capsule are committed to delivering frictionless solutions to our hospital customers that can enable improved patient safety and increased clinical efficiency," said Rasmus Waller, vice president, sales, Cambio "As we roll out Capsule's connectivity and integration solution inside the walls of the hospital, we look forward to exploring opportunities to power new remote care models beyond the hospital with Qualcomm Life."

"We are pleased to announce this new collaboration with Cambio, a renowned and major eHealth player in the Nordic region. Together, Cambio and Capsule will allow hospitals using COSMIC to automate data collection from medical devices to enable easier, rapid and accurate bedside charting, ultimately enabling clinicians to spend more time caring for their patients" said Thomas Olesen, director, sales, Qualcomm Life, Inc.

About Cambio Healthcare Systems

Cambio was founded in 1993 and has since delivered comprehensive IT solutions for healthcare organisations.
